

Report on Motivational Talk

Organized by

Mathematics Section
Applied Science & Humanities Department
SCET

on 14th August, 2018

Objective of the talk:

To inspire and motivate students who get admission to second year degree course after completing diploma course, to achieve success in carrier.

Details of the talk:

The lecture was delivered by **Mr. Mahesh Ramamurthy** on **14 August, 2018** during 03:45 p.m. to 04:45 p.m in N.J. seminar hall, SCET.

Mr. Mahesh Ramamurthy is Director of National Training and Consultancy, Surat which is training and consulting organization specializing in human development programs. He is associated with more than 40 reputed educational institutions of south Gujarat and has trained more than 3,00,000 people (corporate executives, students, parents, teachers) all over India. He has an experience of more than 17 years in training field.

He explained the meaning of the word “**SUCCESS**” (**S**- self motivation, **U**- untiring efforts, **C**- confident attitude, **C**- creative thinking, **E**-effective communication, **S**- superior relation, **S**- safety and health) to our students by showing them some pictures for creative thinking and videos for motivating themselves. He made our students to involve in some activities to build confidence to speak and express but not to impress. He told them to trust and respect elders (especially parents and teachers). He told them to delete the things from the ‘can’t do’ list and transfer it to ‘can do’ list. He insisted them to fix up or set their goal or define the purpose and work hard to achieve it. He makes them understand that intellectual people are always disciplined as only empty vessels make noise.

More than 150 students of second year (D to D & regular) have enthusiastically and actively participated in the talk. And more than 15 faculties have attended this talk. Students got inspired and motivated for successful carrier and future life.

Few glimpses of the talk:
